

MUHAMMAD KAIF

Full Stack AI Engineer

Email: 2004mkaif@gmail.com | Phone No.: +92 334-6510599 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Full-Stack AI Engineer with hands-on experience building scalable AI-powered web applications using Next.js, React, FastAPI, Firebase, MongoDB, and Python. Experienced in integrating Large Language Models (LLMs), NLP pipelines, authentication systems, databases, and REST APIs to develop end-to-end products from frontend interfaces to backend services and deployment. Passionate about building production-ready AI systems that combine modern software engineering with intelligent automation.

Technical Skills

Programming	Frontend	Backend	AI & Machine Learning	Frameworks	Deployment
- Python - JavaScript - TypeScript - SQL	- Next.js - React - Tailwind CSS - Streamlit	- FastAPI - Rest APIs - Firebase Auth - Firebase Firestore - Clerk Auth - MongoDB	- Machine Learning - Deep Learning - Computer Vision - LLM Integration - NLP	- TensorFlow - Scikit-learn - Pandas - NumPy - SpaCy - Mongoose	- Git - GitHub - Vercel - Railway

Professional Experience

AI Automation Intern CodeCelix	<i>Aug 2025 - Nov 2025</i>
- Engineered full-stack AI applications and recruitment automation systems using Next.js, FastAPI, Python, Streamlit, and LLM APIs. - Built resume parsing, semantic job matching, proposal generation, and AI-assisted content automation workflows. - Integrated Gmail, WhatsApp, Firebase, and REST APIs to automate end-to-end business processes. - Collaborated on full-stack AI applications from UI development to deployment and testing.	

Projects

AasaanLearn – AI Platform for Inclusive Education	<i>Sep 2025 - July 2026</i>
<i>Next.js FastAPI Firebase Python OpenAI API Tailwind CSS TypeScript Framer Motion</i>	
- Developed an AI-powered inclusive learning platform for students with dyslexia, autism, and visual impairments. - Built AI features including text simplification, audio narration, quizzes, and visual learning using NLP and LLMs. - Developed a full-stack application using Next.js, FastAPI, and Firebase with secure authentication and user management.	
NextGen Tech – Full-Stack Startup Platform	<i>June 2025</i>
<i>Next.js TypeScript React Clerk MongoDB Mongoose Tailwind CSS API Routes Vercel</i>	
- Developed a full-stack web platform using Next.js, TypeScript, MongoDB, and Tailwind CSS. - Integrated Clerk authentication, protected routes, and MongoDB APIs for secure data management. - Deployed the application on Vercel with responsive UI and production-ready architecture.	
AI Resume Screening System	<i>Aug 2025</i>
<i>Python Streamlit Scikit-learn NLP SpaCy TF-IDF PyMuPDF python-docx</i>	
- Developed an AI-powered resume screening system to extract candidate information from PDF and DOCX resumes using NLP. - Implemented skill extraction, experience analysis, and job-domain prediction using TF-IDF and machine learning. - Built an interactive Streamlit application for automated resume screening and candidate profile.	

Education

Bachelor of Science in Artificial Intelligence	<i>Oct 2022 - July 2026</i>
<i>National Textile University, Faisalabad CGPA: 3.15/4.0</i>	
Thesis: AasaanLearn : AI-Powered Web Based Platform for Students with Special Learning Needs	

Achievements

- Secured 1st Position in the BS Artificial Intelligence category for Final Year Project. - Successfully completed multiple AI internships in Machine Learning and AI Automation. - Built and deployed multiple full-stack AI applications integrating LLMs, FastAPI, Firebase, and Next.js.
